## Experience

### Oversight - Full Stack Developer(SenseApps)

2022 - Present

- Worked with popular messaging platforms like WhatsApp and Facebook Messenger to create automations that improve customer experience
- Integrated with various APIs, including Meta API and Shopify API, to ensure efficient and effective communication between applications
- Designed and implemented UTM tracking features to help users understand how customers engage with their store
- Collaborated with cross-functional teams to deliver high-quality applications in a timely and efficient manner
- Stayed up-to-date with industry trends and emerging technologies to ensure that applications are cutting-edge and effective.

for more information about SenseApps visit - <https://sense-apps.com/>

### Checkpoint - IT Specialist

2021 - 2022

I efficiently diagnosed and resolved problems, ensured all hardware operated at its optimum level with the latest updates and patches, and created a program using C++ to verify the integrity of certain equipment.

I conducted regular tests and maintenance to optimize hardware performance and stayed up-to-date with emerging technologies to continuously improve IT systems and processes.

## Stack

Node.js(Express, Nest, Next.js), TypeScript, C#(.Net), React, Redux, Zod, GraphQL, Restful APIs, tRPC, SQL, NoSQL(MongoDB), Tailwind, ORM, Prisma, Entity Framework, Docker, ESLint, Git, mono repo(pnpm workspace, Turborepo, Nx), Redis, Kafka, TreeJs, AWS, Github Actions, Husky

## Education

Magshimim (National Cyber Program) 2015 - 2018

## Personal Projects

### Portfolio

info: A portfolio project written in React is a web application that showcases a developer's skills and work, built using the React library.

Technologies: Nest.Js, React, GraphQL, Tailwind, MongoDB, TypeScript, TurboRepo, Redis, Vite.

Repository: <https://github.com/NivSv/my-portfolio> demo: <https://niv-shtibel.me>

### Users Library

info: A simple user library. ( at first, adding random 10 users from an outside API)

Technologies: React, Vite, MUI, Redux(toolkit), Zod, Framer motion

Repository: <https://github.com/NivSv/Users-Library> demo: <https://nivsv.github.io/Users-Library>

### Users API

info: This is a simple user API that allows you to perform CRUD (Create, Read, Update, Delete) operations on users using Node.js, Express.js, and a relational database. The API also supports department interfaces with the ability to create and delete departments.

Technologies: Nest.Js, Zod, Typescript, pg, Turborepo

Repository: <https://github.com/NivSv/Users-API> demo: <https://users-api-iexe.onrender.com/api>  
(The service runs on a cold start, so it may take a few minutes before the page is fully loaded and visible.)
