Niv Shtibel

Experience

Oversight - Full Stack Developer

2022 - Present

Responsible for developing several projects, most of them from the ground up as the sole/lead developer, including backend and frontend.

- Sense RTL(production) - Shopify app that takes an existing shop and adds support for right-to-left languages by pushing code to the website (the app translates the website to Hebrew using Shopify API).

- Sense Whatsapp(development) - Project based on Node.js and React. An app that creates automation and mimics a Whatsapp bot and helps you distribute messages to users. The app uses a microservice that makes shortened URLs to provided links and adds UTM parameters to them for later analysis.

- Sense UTM(production) - Project based on Node.js and React. An app that analyzes all data from an existing shop and creates graphs and statistics based on the shop's orders (based explicitly on UTM parameters).

- SBS (production) - Project based on .NET Core (c#) and React. A website that helps personal trainers and their workers to manage customers' meals and workout plans. It also includes a mobile app for customers to view their plans and recipes.

Checkpoint - IT Support

2021 - 2022

Being the first point of call for all IT issues diagnosing and resolving problems efficiently Ensure all hardware operates at its optimum level with the latest updates and patches While I was there I created a program that verifies the integrity of certain equipment using C++.

Magshimim (National Cyber Program)

2015 - 2018

The program taught a variety of programming languages, from the basics of different data structures, recursion, complexity, code conventions, client-server configuration, sockets, TCP/UDP, DNS, OSI model, encryption methods to advanced topics such as dynamic memory, pointers, and assembly.

Skills

- Windows and Linux environments
- Node.js(Express, NestJS, NextJS), React, Typescript, C#(.NET), Java, C, PHP, LUA, Vite GraphQL, tRPC
- Relational Database Structures (SQL) and Non-Relational Database Structures (NOSQL - MongoDB), Web Development, ORM(Prisma, Entity Framework)
- Docker/Git/ESLint/Turborepo

Personal Projects

Task Manager

Technologies: Containerized SQL server(Docker), .NET Core backend, Angular frontend
